Skills
Operating Systems: GNU/Linux, Windows
Programming Languages: Java, JavaScript
Web Technologies: HTML5, SCSS, React, Node.js, Angular, Rest API
Databases: MySQL, MongoDB
Tools: Git, Sublime Text, Eclipse, Excel, VS Code, Postman

Work Experience
Software Developer, **Decimal Technologies Pvt. Ltd. - Gurgaon, India (DEC 2021 –Present)**
- Collaborated with a team of developers in designing and implementing new software features, while also managing comprehensive documentation on platforms like GitLab and JIRA, reducing onboarding time by 15%.
- Leveraged the MVC design pattern to enhance bottleneck processes and focused on creating user-centric business solutions 75%.
- Revamped web interfaces to drive a 40% increase in user engagement and a 30% improvement in data collection efficiency. Employed MVC pattern for optimized data processing, ensuring 99.9% uptime and timely updates.
- Led training and mentoring for junior developers, slashing project turnaround time by 20% and effectively managing up to five simultaneous projects, enhancing team productivity and project delivery.

Software Engineer, Revspire - Marketing CRM platform (DEC 2023 - Present)
- Engineered and managed dashboard applications, streamlining tracking and management of customer interactions, sales data, leads, contacts, opportunities, and cases.
- Leveraged advanced backend development skills in Express.js and Node.js, coupled with frontend technologies including React and Tailwind, to architect and implement a robust, scalable, and user-friendly platform.

Intern, Larsen & Toubro - Faridabad, India (JAN 2019 – JUN 2019)
- Engaged in project management activities, including planning, scheduling, and coordinating with cross-functional teams to ensure timely project delivery.
- Gained hands-on experience in software development, leveraging tools for data extraction, transformation, and loading (ETL).

Projects
E-commerce Store (React, Redux, HTML5, SCSS) (2023)
- Crafted an e-commerce platform with responsive and interactive UI, showcasing a wide array of product categories.
- Seamlessly integrated product listings, detailed views, and a leveraging fake APIs for an authentic experience.

Portfolio (React, HTML5, Tailwind) (2023)
- Designed and developed a sophisticated and responsive portfolio website.
- Implemented smooth and visually stunning and interactive online presence using framework.

Spotify Clone (React, Redux, HTML5, SCSS) (2022)
- Reproduced Spotify's intricate front-end, maintaining a 98% design accuracy.
- Utilized Redux for state management and integrated real-time data retrieval via the Spotify API.

Education
Bachelor of Technology - Symbiosis Institute of Technology (2016-2020)
- Member of the university's Tech Club, organizing and participating in various tech events and workshops.
- Conducted structural analysis and design of various building components using STAAD.Pro software.

Full-Stack Development - Coding Ninjas (2020-2021)
- Achieved a proficiency certificate, top 5% performance in the cohort.
- Implemented responsive design and used React for the front-end, creating an intuitive user interface.
- Created an interactive and visually appealing music player screen using HTML and CSS.

Achievements
- Employee of the Quarter Award at Decimal Technologies for innovative solutions in project implementations.
- Geeks for Geeks Coding Challenge (2021) **-** Demonstrated coding expertise by solving problems across Basic, Medium, and Hard categories.
